

ABC DOCKS

Aaron-Bradley™ E100 Fabric Door

- **Low Cost** ... Rugged yet economical solution for environmental separations where high speed is not a requirement. Pre-wired operator with integral control panel requires a minimum of electrical wiring.
- **Door Curtain Material** ... Weather and puncture resistant fabric with a layer of woven Polyester monofilament PVC, available in a wide spectrum of colors.
- **Virtually Indestructible** ... Takes a hit, the optional break away bottom bar gives away allowing for fast and easy repair without the use of special tools.
- **Minimal Maintenance** ... Designed with fewer moving parts, the E100 provided worry free access through your opening, using only the best quality components available.
- **Zero Downtime** ... Even after an impact this door is designed to have you up and operating in minutes, allowing your facility to keep running without interruption.
